Response to Question 17: The Claimant understands Question 16 to ask for the existence of historical documents demonstrating that Grace's asbestos-containing product was purchased and/or installed in the property. As indicated in its response, the Claimant does not know of any such specific documents at this time. The Claimant assumes that there would have been a large number of original construction documents, including drawings and specifications, which, if not destroyed in the ordinary course of business, might possibly be found at a number of storage facilities, including those under the control of various persons involved with the design and construction of the property and the sale and installation of products in the property. In addition, this claim is based upon an assertion that debtors manufactured or sold products containing asbestos that are or were present in this property and/or all other theories of liability that are allowed by law including but not limited to conspiracy and fraudulent transfer. Moreover, Claimant believes Grace itself may be in control of supporting documentation, or other supporting information, regarding whom Grace or their salesmen sold their products to, and Claimant may need documentation or discovery from Grace on this issue. Claimant does not waive any rights, but is willing to discuss this matter with Grace if it believes Claimant's response is insufficient.

Response to Question 19: Refer to Question 17 Response.

Response to Question 21: Refer to Question 17 Response.

Response to Question 23: Taken literally, Question 22 seeks all documents relating to not only the removal, enclosure and encapsulation, but operations and maintenance documents which attempt to contain contamination from Grace's product. There is insufficient time to locate all such documents that might be called for in Question 22. To the extent that such documents have not been destroyed in the ordinary course of business, they may exist in the files or dead storage of many persons involved with such projects. Before undertaking an effort of this magnitude, Claimant would like to work with Grace to understand exactly what it is that Grace is seeking and whether Claimant can easily accommodate that request.

Response to Question 27: As Claimant understands Question 26, Grace seeks all documents of every kind and description not only related to the testing or sampling for the presence of asbestos, including samples taken during any abatement projects, as well as all samples related to any other particulates, including, by way of example only, all silicates, lead dust and other metal dust, beta glucans, etc. Such documents, to the extent they exist, may not only be in the possession of Claimant, but a number of third party contractors and/or consultants as well. Before undertaking the search for all of these documents, Claimant wishes to discuss this matter with Grace and obtain a clarification.
